

ABSTRACT OF THE DISCLOSURE

A stacked small memory card includes an upper memory card and a lower memory card, the upper memory card and the lower memory card respectively formed a first heat sink and a second heat sink, the first heat sink and the second
5 heat sink is stacked together, so that, the heat of the upper memory card and the lower memory card may be dispersed via the first heat sink and the second heat sink. Thus, the stacked small memory card of present invention having high function of disperses heat to promote its durability and lifetime effectively.
